

## PRO-VAC P85 POLYESTER PEEL PLY

An 85g/m<sup>2</sup> heat set and scoured polyester peel ply fabric

### Description:

- Designed for hand lamination and the vacuum infusion process
- Has a light red tracer as a visible indicator to reducing the possibility of any peel ply being left on the laminate
- The fabric leaves a finish that can aid in the sanding or grinding of the laminate
- This product can be used with Phenolic resins as well as all other standard resin systems but we do recommend that trials are conducted to evaluate compatibility

### Technical data:

Part number	PVP85
Colour	Natural with light red colour tracer
Width	0-1520mm
Length	100m / roll
Area Weight (g/m <sup>2</sup> )	85 g/m <sup>2</sup> ±3%
Maximum use temperature	180°C

\*please note that the maximum use temperature is process specific, therefore we recommend that tests are performed on the peel ply prior to use at elevated temperatures

### Packaging and storage

It is recommended that the peel ply are stored in a cool and dry environment. Recommended temperature range of storage is between 10 ~ 30°C and relative humidity between 50 ~ 75%. The peel ply should remain in the packaging until just prior to use.
